

### **Java Backend Developer - API Team (m/f)**

We are looking for a (Senior) Java Backend Developer to join API Team. As a developer in our team you will play a key role in writing services towards a microservices architecture while regarding the current system. By this you will help our company to provide features in different domains such as restaurants, customers and ordering.

### **How you describe your team to your friends**

“Our team has the opportunity to play a leading part in designing, developing and maintaining new company-wide used services, while considering integration with existing systems and teams. We enjoy a lot of freedom in terms of architecture as well as priorities, and have a role in shaping the technical future of the company.”

### **The position**

- Define, develop, test and maintain clean and self-explanatory endpoints for RESTful APIs using continuous integration, microservices patterns and other related topics
- Develop features for different data domains (order, customer, restaurant, etc.), keeping testability and performance in mind
- Provide support to others both within and outside your team
- When required, explore new technologies, weigh their pros and cons and share your insights within your team

### **Your profile**

- You are a team player who enjoys an agile environment and loves team collaboration and knowledge sharing
- Highly proficient (at least 3 years) in Java backend development (Spring Boot)
- Experience with relational SQL databases (MySQL)
- Experience working with Docker
- Familiar with DevOps mentality and CI/CD systems
- Good communication skills in both written and spoken English

### **The following would be a plus:**

- Experience with other microservices or cloud solutions and tools, such as Kubernetes, AWS, Kafka, Consul and Mesos/Marathon
- Experience with Domain Driven Design (DDD) in a microservices environment

### **Our Offer**

- As you'll be joining a young team, you will be constantly presented with novel puzzles and will be unfettered by legacy code
- You'll become part of a team that prides itself in owning its stack and you'll have the opportunity to make your voice heard during technical and design discussions - your opinion will count.
- Company contribution toward your pension saving
- Awesome (global) team events like the summer party, skiing trip and more!
- Table football, billiard and Playstation in the kitchen
- Contribution to your travel cost with the amount of the BVG monthly abonnement
- An attractive location with roof terrace close to Potsdamer Platz
- Workshops, conferences and training seminars to support our growing team
- Inhouse German language course
